AGENDA

- **EXECUTIVE SUMMARY OF THE PROJECT**
- **PROJECT CONCEPTS**
- **VISUALIZATION AND INSIGHTS**

EXECUTIVE SUMMARY

This **Data Analysis Project** aims to provide actionable insights into the company's sales performance by evaluating data across multiple dimensions—products, categories, customers, and store locations. The objective is to support informed decision-making by identifying trends, optimizing sales strategies, and enhancing customer satisfaction

KEY AREAS OF ANALYSIS

Sales Metrics

Customer
Insights

Product
Performance

Store
Performance

PROJECT CONCEPT

- The concept of this Data Analysis Project is to apply a **data-driven decision-making framework** to evaluate sales performance across multiple dimensions within the business. By transforming raw transactional data into meaningful insights using **SQL** for data preparation and **Power BI** for visualization, the project seeks to empower stakeholders with a clear understanding of key business metrics.
- The approach is based on three core pillars:
 - i. Data Integration and Structuring
 - ii. Metric-Based Analysis
 - iii. Insightful Visualization and Communication

Data Integration and Structuring

- Collect and organize sales data into a relational database structure.
- Use SQL to cleanse, transform, and prepare the data for analysis.

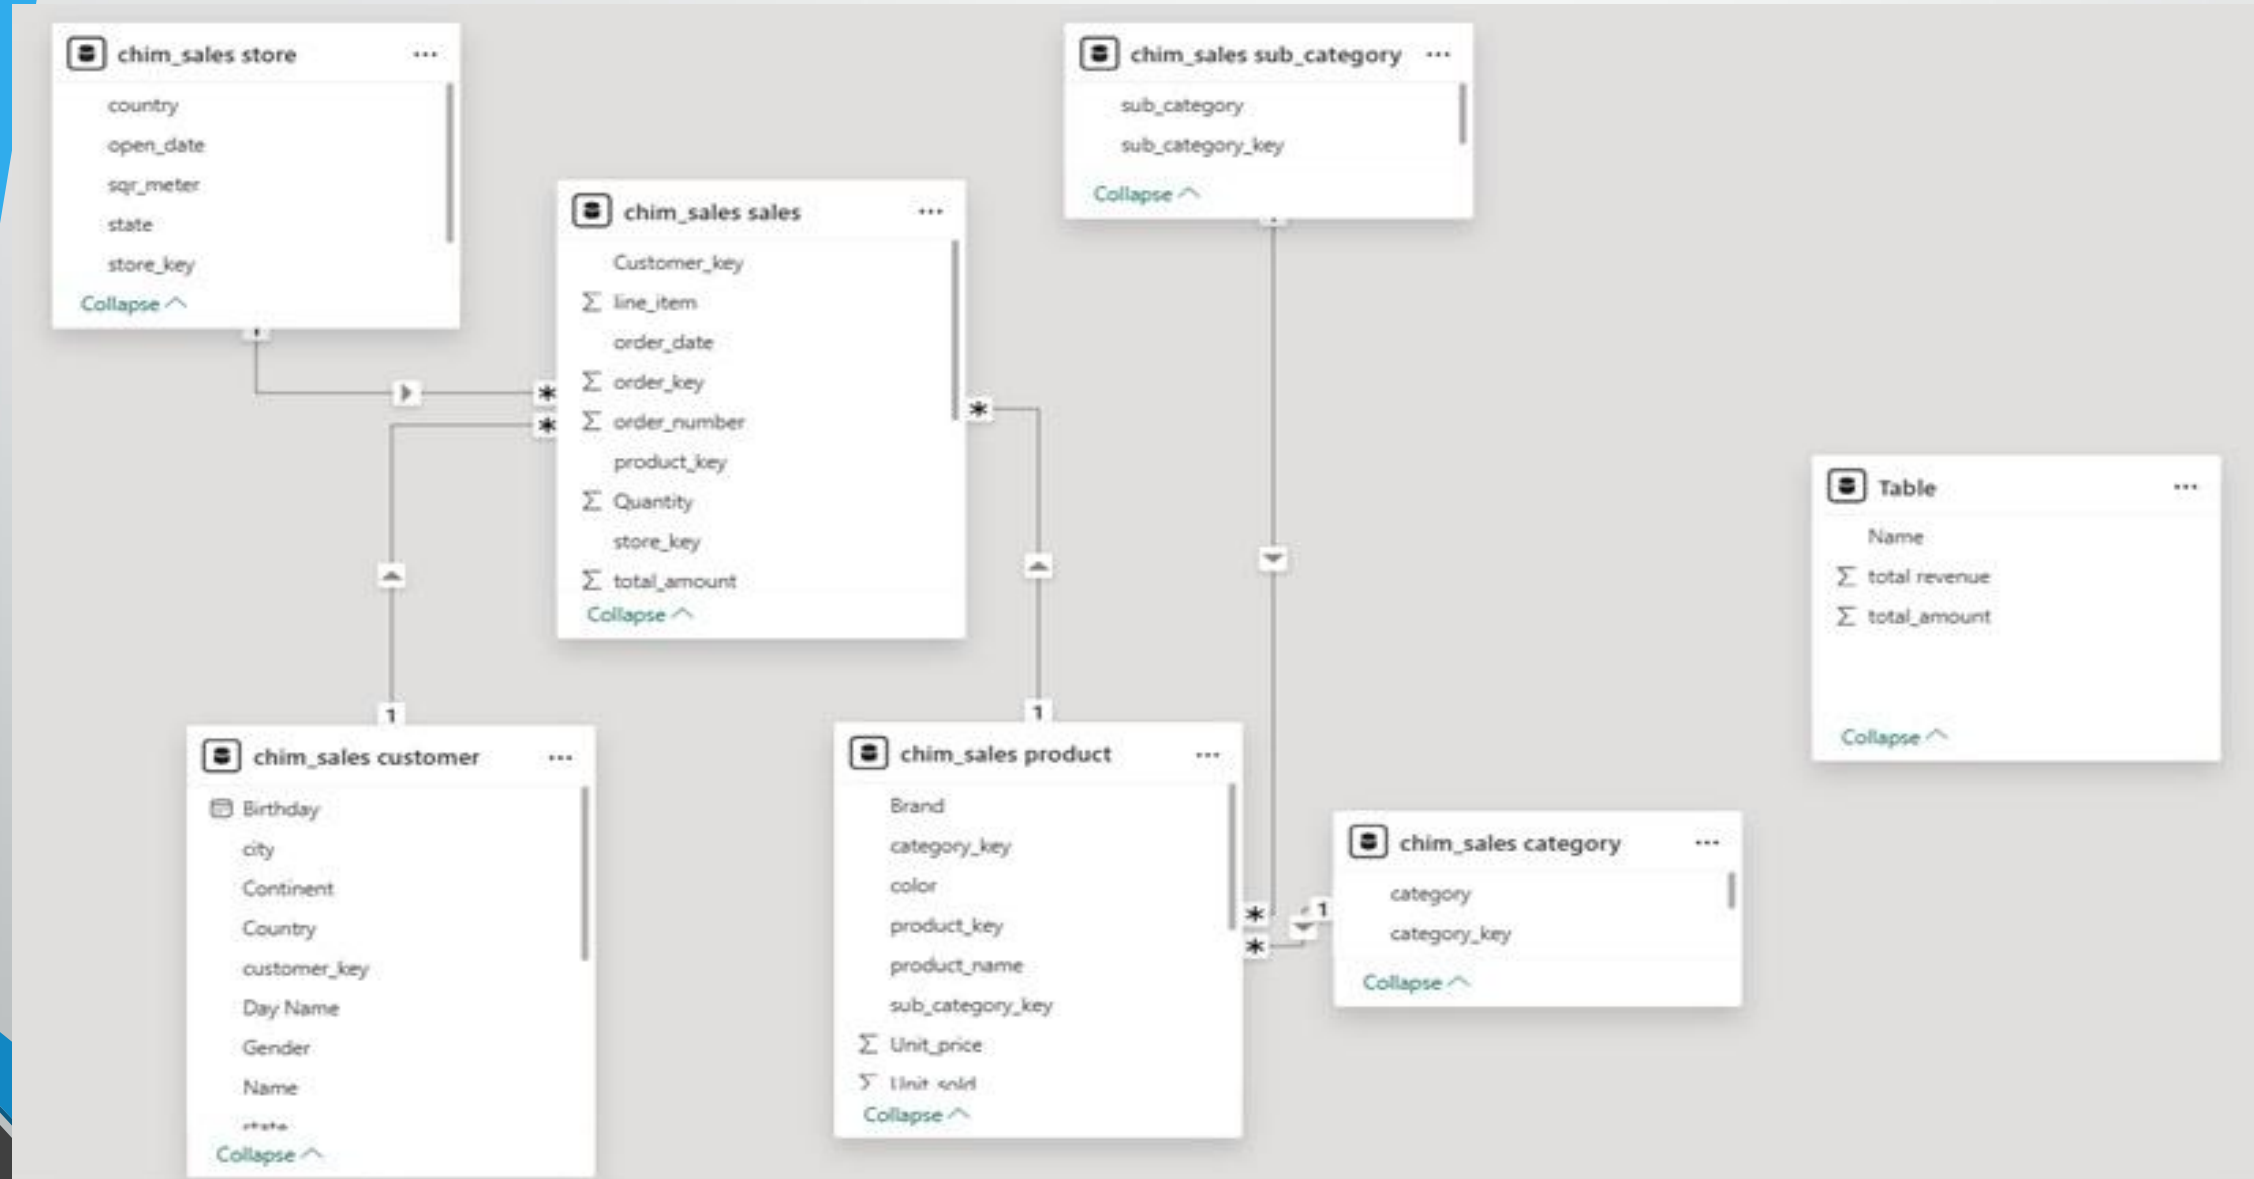

Metric-Based Analysis

- Develop a focused set of metrics to evaluate sales, customer behavior, product performance, and store efficiency.
- Ensure the metrics are actionable and aligned with business goals

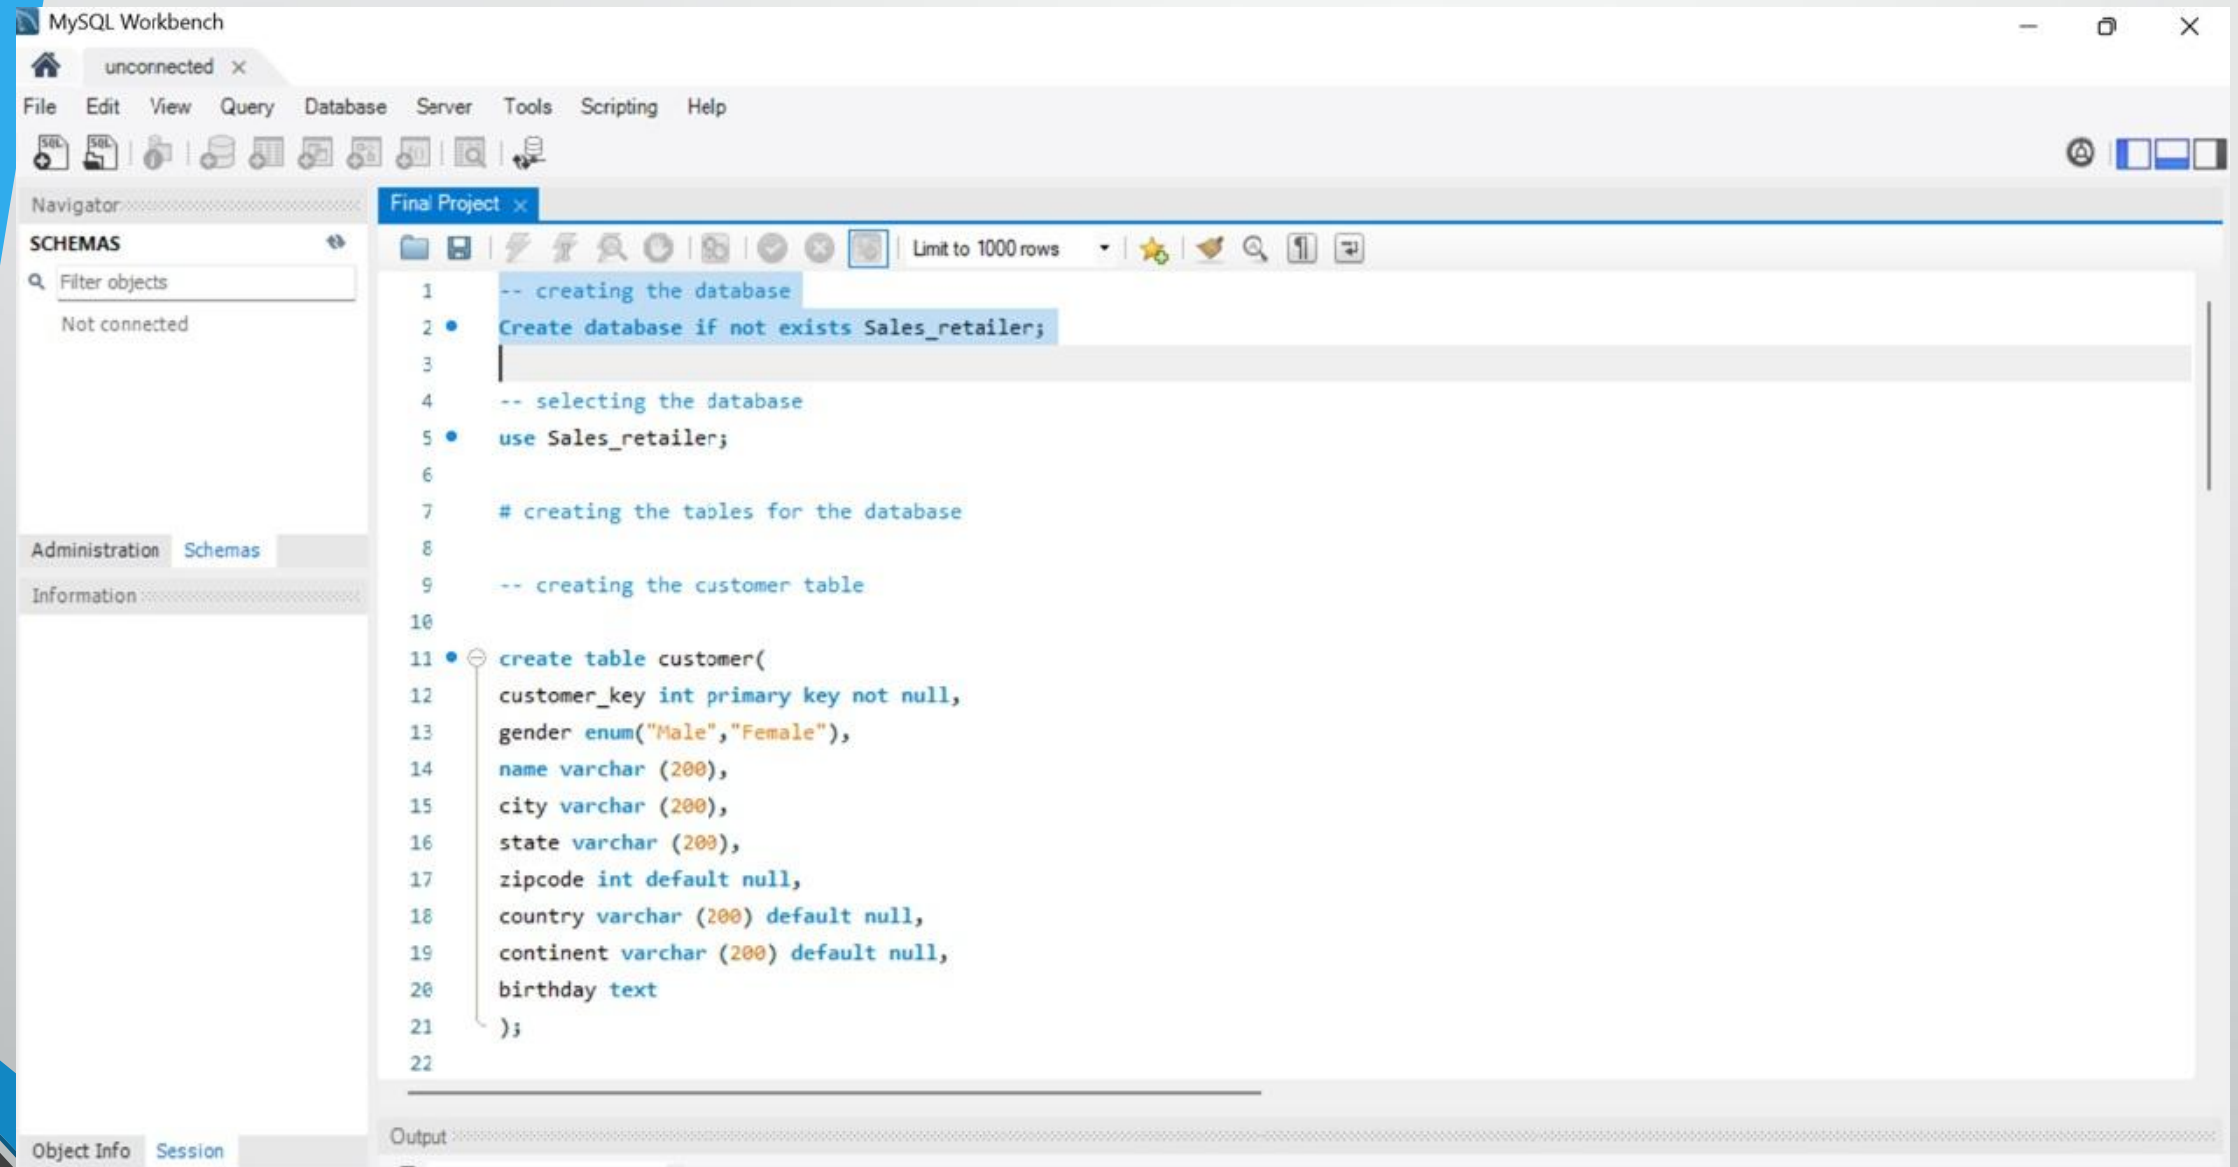

Insightful Visualization and Communication

- Build an interactive and user-friendly dashboard in three categories of Sales Performance, Customer Performance and Product Performance in Power BI
- Enable stakeholders to explore data dynamically, identify trends, and make evidence-based decisions

VISUALIZATION AND INSIGHTS

CUSTOMER ANALYSIS INSIGHTS FROM CUSTOMER PERFORMANCE ANALYSIS

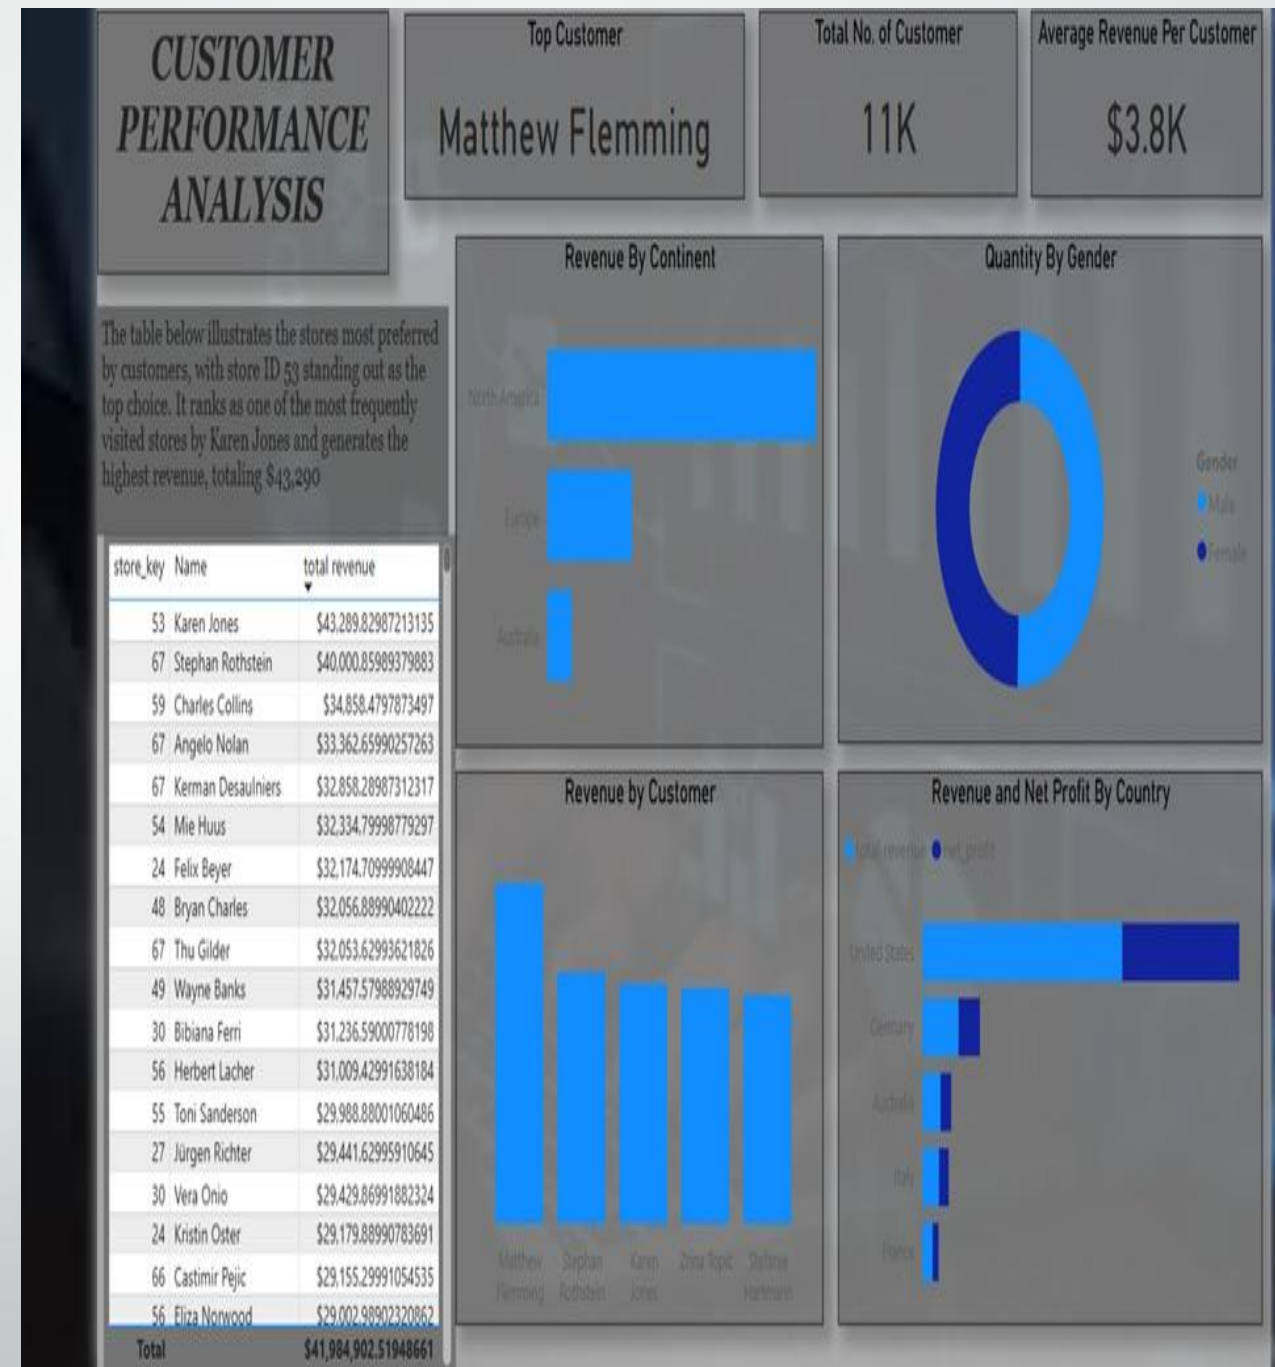

- There are about 11000 total number of customers
- Average revenue generated per customer \$3,800
- The top customer is Matthew Flemming while Stefanie Hartmann is the least customer by total revenue contributed
- The order of revenue generated by continents are as follows North America > Europe > Australia

CUSTOMER ANALYSIS

INSIGHTS FROM CUSTOMER PERFORMANCE ANALYSIS

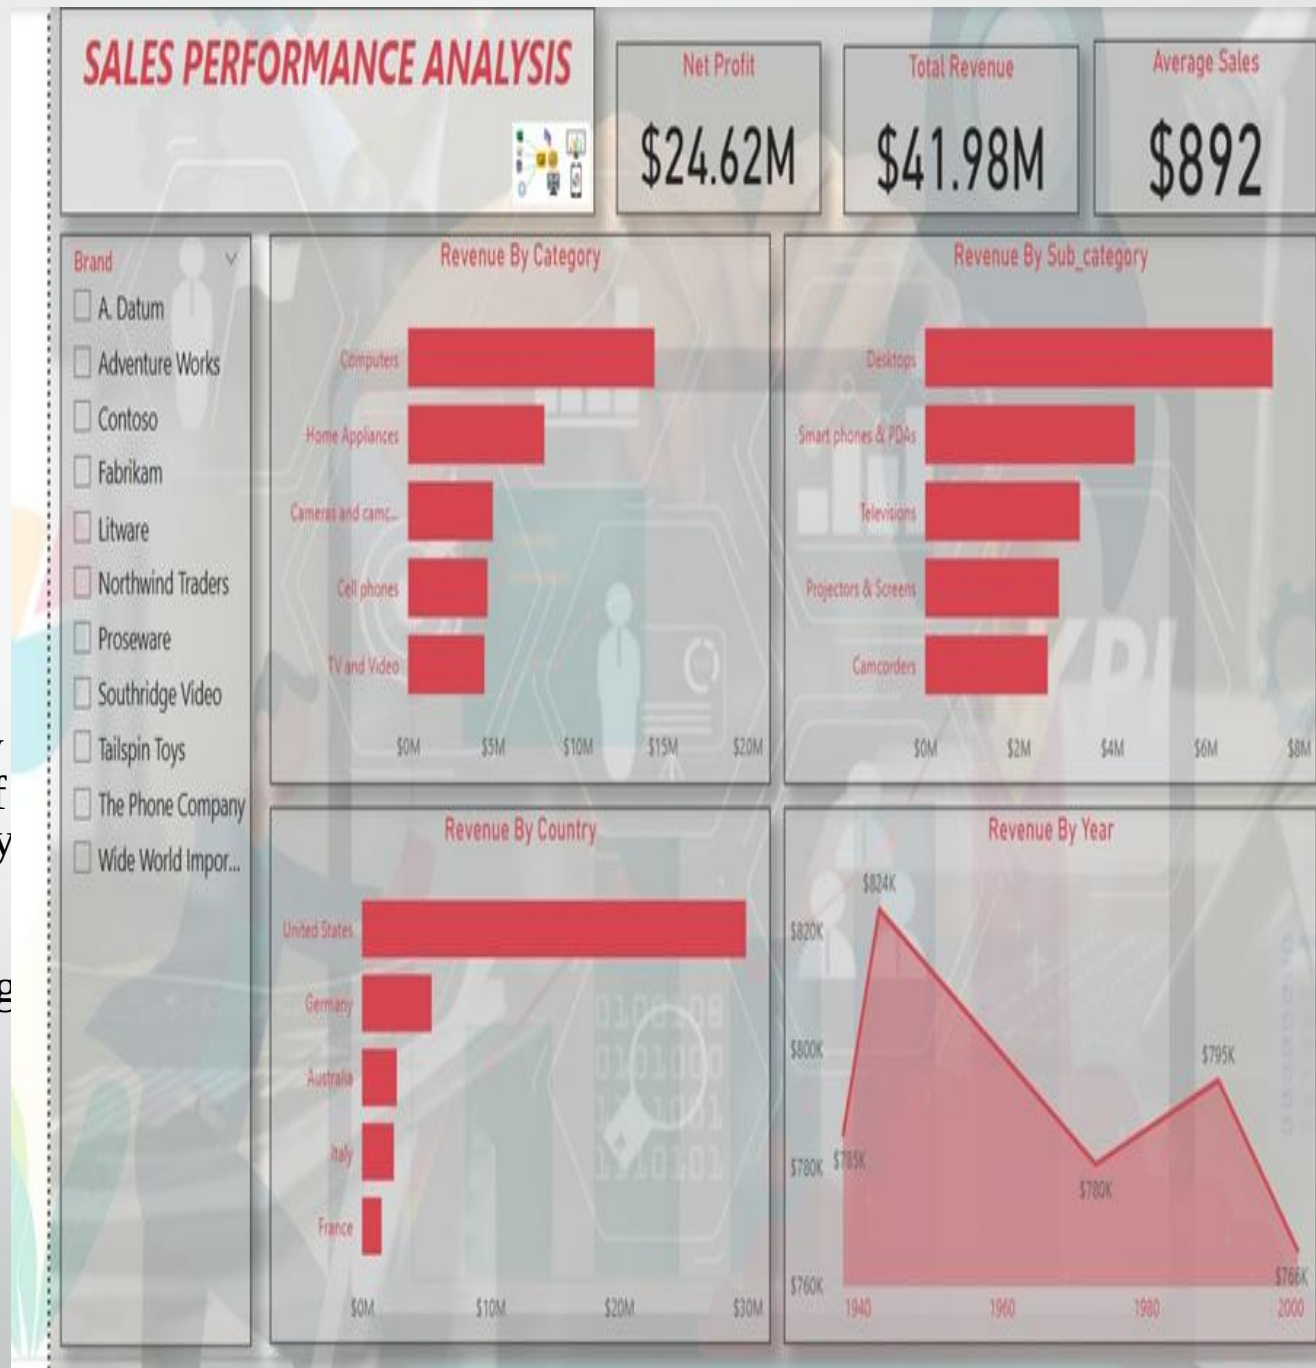

- Store ID 53 stands out as most frequently visited by Karen Jones generating a total revenue of about \$43,290
- Male gender purchased the most quantities of 50.48%
- The top countries generating the most revenues are United States followed by Germany followed by Australia followed by Italy and the France
- The total revenue generated by the United state and France are about \$29,871,631 and \$1,515,338 respectively

SALES ANALYSIS

INSIGHTS FROM SALES PERFORMANCE ANALYSIS

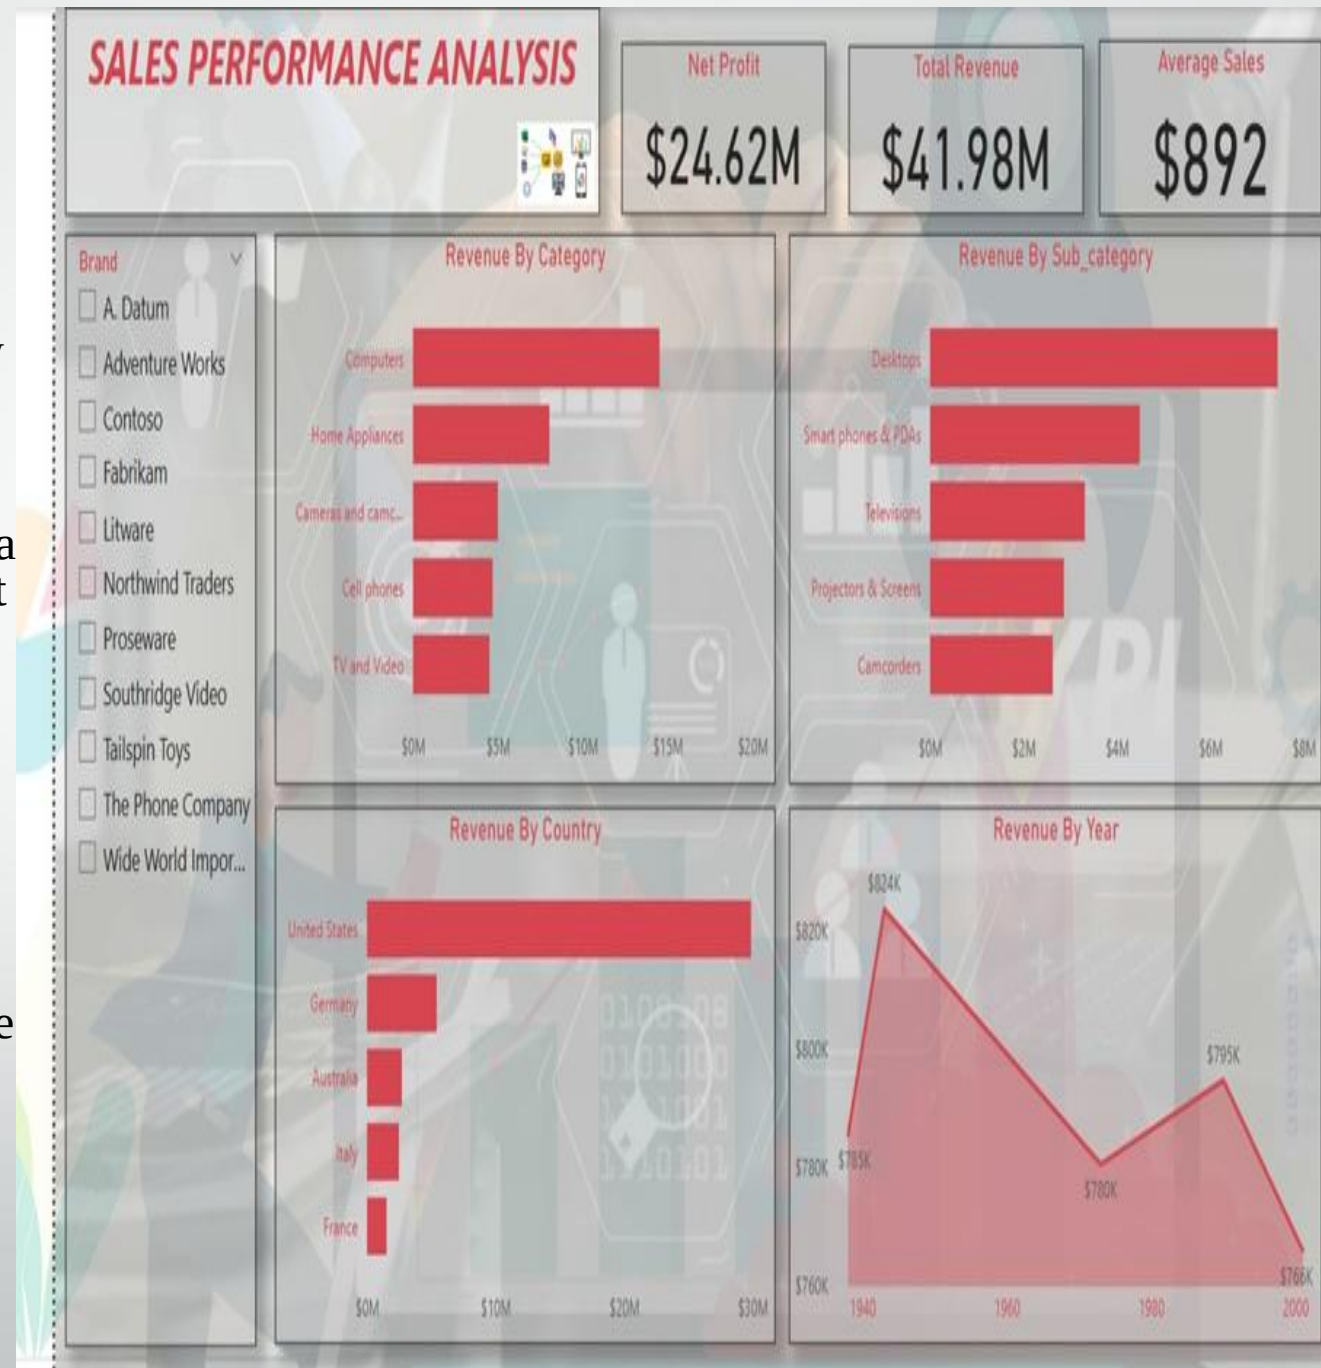

- The total revenue generated is \$41.98 millions
- Average product sale is \$892
- The net profit generated is \$24.62 million
- Top selling category is Computers followed by Home Appliances generating a total revenue of about \$14,514,256 and \$8,029,794 respectively
- The total revenue increased steadily, generating a peak value of about \$823,743 in 1943.

SALES ANALYSIS

INSIGHTS FROM SALES PERFORMANCE ANALYSIS

- After then, it decreased slowly reaching a low value of about \$780,460 in 1973
- A sudden overturned was observed, reaching a maximum value of \$794,695 in 1990 before it start decreasing again
- The lowest revenue of about \$765, 838 was generated in 2001
- The top selling category, sub_category and country are Computer, Desktops and the United States respectively

PRODUCT ANALYSIS

INSIGHTS FROM PRODUCTS PERFORMANCE ANALYSIS

- The Average Product Price and Average Product Cost are \$357 and \$148 respectively
- Best selling category is Computer
- The product most frequently purchased is WWI Desktop PC2.33 X2330 Black
- Desktops, Smartphones and Personal Digital Assistant (PDAs) are the best selling sub_categories having a total revenue of approximately \$7,437,777, \$4,485,242 and \$3,310,714 respectively

PRODUCT ANALYSIS

INSIGHTS FROM PRODUCTS PERFORMANCE ANALYSIS

- Cell phone accessories, fans, and boxed games are the least selling sub_categories having a total revenue of approximately \$94,000, \$74,000 and \$70,000 respectively
- Adventure Works and The Phone Company is the top and least selling brand in that other
- Products of blue coloration generate the most revenue while Red generate the least
- The least selling product is Litware120mm Blue LED Case Fan E901 Black

CONCLUSION

This Data Analysis Project has provided a comprehensive evaluation of sales performance across products, customers, categories, and store locations. By leveraging SQL for data transformation and Power BI for visualization, we have transformed raw data into actionable insights that can drive strategic decision-making. The analysis revealed critical trends in customer behavior, product performance, and store efficiency, enabling the business to pinpoint opportunities for growth, optimize pricing and marketing strategies, and improve overall operational performance. With the implemented dashboard and the metrics developed, stakeholders now have a powerful tool for monitoring performance in real time, identifying areas for improvement, and making informed, data-driven decisions.

RECOMMENDATION

- Refine sale strategy by prioritizing marketing and inventory allocation for best selling product and category which are WWI Desktop PC2.33 X2330 Black and Computer
- Consider bundling low selling sub_categories which includes Cell phone accessories, fans, and boxed games Store ID 53 to boost revenue generation
- Enhance customer engagement by implementing loyalty programs for or personalized promotions for Matthew Flemming
- Allocate resources and promotional efforts to high-performing store (Store ID 53)
- Optimizing pricing strategy by reviewing average product pricing to align with customer purchasing patterns.\
- Investigate reasons why Austalia continent and France are generating the least revenue
